FRUIT TREES

**WORLEY'S NURSERIES**

YORK SPRINGS, PA.

PHONE 4-R-2

To Our Customers,

Our supply of fruit trees is extremely short this year. Many varieties that we ordinarily grow, are not listed and our supply of some of those listed is limited. So please do not feel disappointed if we cannot furnish the size and amount of any particular variety wanted. Our supply of 2 yr. apple is short but we do have a fair quantity of 1 yr. apple in the 3-4 ft. and 2-3 ft. grades.

We have a fair amount of peach trees available in the varieties listed.

Pear trees are available in a very limited number. Likewise with the Sweet and Sour Cherries, and our supply of Plum trees is normal.

We have a fine selection of shade trees available and in addition to the ones listed we have quite a few extra large shade trees that we are selling at bargain prices.

We would like you to come to the nursery if you are within driving distance. You not only save on shipping costs, but you are able to see and select the sizes and varieties you want.

Our nursery is located along U. S. Highway Route 15, about 16 miles from Gettysburg and about 21 miles from Harrisburg. When on this road just look for the white barn with our sign on it.

OUR GUARANTEE

We guarantee every tree to be as represented in grade and quality and if on arrival you do not find our trees to be exactly as we say they are, return them to us securely packed and in good condition and we will return your money immediately.

We offer only the finest select disease free true-to-name fruit trees. We guarantee every plant to start to grow, if properly planted and cared for according to the instructions you will receive with each shipment.

We will replace any tree which does not perform according to the above guarantee at one-half the purchase price providing you mail us a report on or before August 1 on shipments made the preceding fall or spring stating that you have given the trees proper care.

Send copy of order on which replacements are being made when requesting a replacement.

YOUR RESPONSIBILITY—Worley's fruit trees need comparatively little care due to the excess vigor and root system we have cultivated in them. But they must be given fertile soil, sun and water, and proper cultivation to keep them vigorous. Follow our planting instructions and you will be rewarded with an abundance of fresh profit-making fruit in a short time.

The greatest of care is taken to have all fruit trees and other nursery stock that we sell true to label. We believe that no other nursery takes as great a precaution as we do in this serious matter and any proving not so will be replaced upon proper proof. It is mutually agreed between us and the purchaser that in no case shall our maximum responsibility exceed the original amount paid.

➤ Anjou

Chinese Chestnuts

➤ Ching Chow—A truly blight resistant strain, probably more so than any others. The trees grow fast, and are heavy producers of big tasty chestnuts the second or third year after planting. The tree is also very suitable for ornamental purposes. Plant in pairs for cross pollinization.

PRICES

	<i>1-9</i>	<i>10 or More</i>

4-5 ft.	3.00	2.50
5-6 ft.	3.50	3.00
6-8 ft.	4.00	3.50

Cherry Trees

Cherry trees will not thrive on flat or wet land. The soil must be dry. It might be light sand or clay loam, or any soil between these. The only stipulation is dryness.

Also another important fact about cherry trees is the rootstock; namely, the Mazzard and Mahaleb. The Mazzard is the old type rootstock that your father and grandfather would graft. These are natural sweet cherry roots and live over a long period. The other is the Mahaleb, the imported sour cherry root. This rootstock is standard for sour cherries but when sweet cherry varieties are budded on this root they usually have a shorter life than when budded on the Mazzard rootstock.

Sour Cherries

Virus-Free Budwood Budded on Virus-Free Rootstocks

All the Mahaleb rootstocks on which we bud our Sweet and Sour Cherry trees are grown from domestic virus-free seed produced in Oregon.

The seed for the stock in this orchard was selected from virus-free parent stock tested and certified by the Oregon Department of Agriculture.

The strain of Montmorency was selected from the C. H. Musselman Company orchards and planted by the Pennsylvania State College Agricultural Experiment Station at Arendtsville, Pennsylvania, for the sole purpose of obtaining an orchard that is free of virus diseases. In this way they are able to supply the more progressive nurserymen with budwood free from the dreaded virus diseases and also with a true-to-name strain of Montmorency that is superior to all others. It is from this orchard that we obtain all our budwood for our sour cherries.

We grow no other variety of sour cherry because there is no reliable source of virus-free budwood for these other varieties and this way we eliminate chances of contamination in the nursery.

Along with these precautions we are producing the trees in an outlying area, isolated from surrounding, contaminated, cherry orchards.

This year we believe we are offering you a Sour Cherry tree that is as nearly free of virus diseases as can be grown.

LIST OF PLUM VARIETIES

✓ Fellenburg (Italian Prune)	✓ Mammoth Cardinal
✓ Stanley Prune	✓ Santa Rosa
✓ Shropshire Damson	✓ Satsuma
✓ Burbank	✓ Wickson
✓ Shiro	✓ Red June
✓ Methley	✓ Abundance
✓ Bradshaw	✓ Beauty of Naples

NECTARINE VARIETIES

✓ Sure Crop—White
✓ Garden State—Yellow

POLLINATION OF PLUMS—With the exception of Stanley, which is self-fruitful, all the prune plums should be inter-planted to insure a good set. Of the other varieties, Burbank, Shiro, Red June and Methley each can be planted by themselves, but you will receive better results if two or more varieties are inter-planted.

POLLINATION OF CHERRIES—Governor Wood, Black Tartarian, Windsor and Yellow Spanish can be planted by themselves. The other varieties are self-unfruitful and must be planted along with one of the above named varieties. The best variety for pollination is the Black Tartarian.

Quince Trees

Very dwarf type trees, that will grow in a small area. Any type of soil will give good results, even lowland.

Shade Trees

Decorative and Flowering Trees

European Mountain Ash. A very attractive, hardy tree, which bears clusters of scarlet berries from July to winter. **Price—5-6 ft., \$4.75 each.**

Clump Birch. White birch clumps of 3 or more stems. **Price—4-5 ft., \$4.00 each.**

Cutleaf Weeping Birch. Has an attractive white bark, light green leaves which are finely cut and has long drooping branches. **Price—5-6 ft., \$5.00 each; 4-5 feet, \$4.25 each.**

Kwanzan Flowering Cherry

The kind that is planted at Washington, D. C. Double Flowering, dark pink, blossoms in early spring. **Price—4-5 ft., \$4.00 each.**

Weeping, Double Flowering Cherry

Dark pink blossoms produced on slender pendulous branches. Blooms in early May. Well developed heads on 5-6 ft. stems. **Price—5-6 ft., \$8.00 each.**

Bechtels Flowering Crab

A double flowering and medium sized tree producing an abundance of pink rose-like flowers in spring. **Price—3-4 ft., \$3.00 each.**

Eleyi Flowering Crab

A purple leaf tree producing an abundance of reddish pink flowers in the spring. **Price—5-6 ft., \$3.00 each.**

Hopa Flowering Crab

An ornamental tree producing an abundance of bright red flower clusters in spring. **Price—3-6 ft., \$3.00 each.**

Dogwood. White flowering. **Price—2-3 ft., \$2.50 each; 3-4 ft., \$3.50 each.**

Pink flowering Dogwood. **Price—2-3 ft., \$3.50 each; 3-4 ft., \$4.50 each.**

Paul's Scarlet Hawthorne. Produces masses of double scarlet flowers in spring. The tree is vigorous and hardy, it has a yellowish green bark. A very showy shade tree. **Price—5-6 ft., \$4.75 each.**

Moraine Locust (Plant Pat. No. 836). An improved strain of the Honey Locust. It is a large, fast growing tree that is disease resistant. Its small leaf type and deep rooting habits make it comparatively easy to maintain lawn under the tree. **Price—5-6 ft., \$6.00 each.**

Crimson King Maple (Patent No. 735). Red leaf, truly the King of all maples. A maroon or red leaf tree which maintains its color throughout the summer. **Price—5-6 ft., \$6.00 each.**

Norway Maple. Large green leaves. Tree very vigorous, an excellent shade tree. **Price—5-6 ft., \$3.75 each.**

Schwedler Maple. Similar to the Norway Maple except the leaves are a bright red in spring and turn to a purple in late summer and fall. **Price—5-6 ft., \$5.00 each.**

Sugar Maple

This is the hard maple that is the source of maple sugar sap in early spring. The tree is conical in shape and produces brilliant scarlet, orange, and yellow foliage in the fall. **Price—5-6 ft., \$4.50 each.**

Blueberries

Sprays - Fertilizers

RA-PID-GRO—Here is a completely soluble fertilizer easy to use on all types of trees, vegetables, berries, farm crops, evergreens and lawns. Ra-pid-gro is shipped in dry form and all you do is add water and apply to the base of the plants or spray it on the foliage. Ra-pid-gro, applied to the foliage, enters the sap stream at once supplying immediately a completely balanced food formula containing all of the known chemicals, trace elements and vitamins necessary for growth and production and for a vigorous healthy plant life. If interested in more information about Ra-pid-gro, write us for latest literature.

Price— 1 lb. Package	\$ 1.30
5 lb. "	4.75
25 lb. "	21.00

ORDER EARLY. To avoid the usual rush at shipping time, place your order early as it enables us to save for you the varieties ordered, and you are assured of getting varieties wanted.

All packing will be done in boxes or bales, thus protecting the roots and trees in shipping. No extra charge is made for packing.

All shipments are delivered to shipping point without additional charge.

The spring shipment of nursery stock begins about March 15 to April 1 and fall shipments about November 15, depending on the season.

TERMS: Cash with order or a 25% deposit required with the order, balance due ten days before delivery. We will ship C. O. D. on request, buyer to pay C. O. D. charges. We cannot accept C. O. D. orders without a 25% deposit.

A certificate of nursery inspection issued by the Commonwealth of Pennsylvania will accompany each shipment of nursery stock sold by us.

Extra Large FRUIT TREES

This year we are able to supply our customers with extra large size fruit trees in peach, apple, sweet cherry, sour cherry and plum trees. Many of these trees will bear the following year after planting if properly planted and cared for. All of Worley's extra large fruit trees are extra-select, well-rooted, well-branched and hardy disease free. Prices for all varieties are \$3.00 each or \$25.00 for ten.

All-Purpose FRUIT SPRAY or DUST

We can now offer to our customers a complete spray to use against insects and diseases of apple, pear, peach, plum, cherry, and grapes. The fruit gardener will not need to bother about mixing all different spray materials for just a few trees. This will take care of all his fruit trees throughout the summer; however, it will not replace the dormant spray. Easy to follow directions for use are included on each package. **Price—\$2.00 per 2 lb. package.** Enough to spray 5 trees for an entire season.

Dwarf Fruit Trees

We are now growing many of the Malling Rootstocks for Custom budding only. We will be glad to furnish information about the Dwarf and Semi-Dwarf stocks on request.

Extra Large Shade Trees

We have White Birch, Paul's Scarlet, European Mt. Ash, Flowering Cherry, and Maple in sizes 12 feet and up that are well branched.
